## **Accessory Shelf Instructions**

The installation of the Accessory Shelf requires no tools. Simply remove the retaining clip from one of the wheels and remove the wheel and washer. Next, pull the axle out of the holes running thru the tubing. Place the Accessory Shelf between the tubing with the bent flange facing towards the back, (away from the bag) and the axle support flanges facing down. Now replace the axle thru the tubing and the axle support holes provided in the Accessory Shelf. The Accessory Shelf should be sitting on top of the axle. Replace the washer and the wheel, then the retaining clip.

That's all there is to it.

I hope this accessory will make your shooting a little more enjoyable.  
Thanks for the purchasing our products.

Bob Schneller
